Subject: Towers

Mr Osborne

Greetings

My name is Charles Meade I am the owner of the property to the east side of 370 Panamint where the special use permit for towers is proposed. I have common property line of over 1000'. I have a few concerns over this project.

1 the possibility of a tower with such a immense height should fail in any way would land on my property and harm my family or damage my property it is my understanding that the towers are second hand I hope all welds have been inspected by a third party inspector as code would require all new and old welds . If approved would the county be taking the liability in the event of a failure.

2 I have had my property surveyed I believe the towers guy line bases are encroaching on my property I can not tell if this the case any more as workers of Toms have removed the survey stakes when installing under ground wires on the property line. Why are the setbacks for the 10 acre VC Highlands not enforced of 15' for the side line.

I believe towers should not be permitted to be tall enough to fall on to any other property other than the owner of the towers, also you must maintain the setbacks for 10 acre property's and require a Nevada survey to check the placement of all parts of the towers and map them on a stamped map recorded at the county.

Please forward on to all thank you.

Charles Meade

380 panamint rd.
